JULIUS-K9® CATALOG

[julius-k9.com](http://julius-k9.com)

You are holding the catalog in your hands that represent the brand of what European dog owners say is the brand by which all others are measured

As the CEO of JULIUS-K9® I am never satisfied and there is no limitation to my perfection. But I must say that the items presented here are of the highest quality and functionality as proven by the most challenging buyers, who have become satisfied regular customers. To be able to experience this customer loyalty is a tremendous source of joy to me. Please know that with the most precise workers by my side I will continue to do everything in my power to provide the highest level of customer satisfaction.

When you are holding one of our products in your hands, I ask you to keep in my mind that all feedback and complaints are personally appreciated. This is the only way that I can offer outstanding – honestly, the best products to dog owners.

*Thank you:*  
Anikó Bakos & Julius Sebő,  
owners, CEO of Julius-K9®

## IDC® POWERHARNESS GENERAL INFORMATION

The most successful dog harness in Europe is the European made IDC®-Powerharness, protected by registered Utility models and Designs, harmoniously uniting aesthetic experience and value. Similarly to the most famous patented ideas of the world, JULIUS-K9® inventions are also based on the further development or perfection of products already present, even widely used in the prior art. In the case of the JULIUS-K9® dog harness achieving world success, the aim was also to create the "perfect" one from a practical point of view.

A dog harness that is a high visibility vest, suitable for lifting the dog, attaching side bags, simple to put on even for everyday dog owners, moved the imagination of the leading armed forces and rescue dog units of the world as well at the end of the 1990s. A reliable professional production team made it possible to implement the handle and closing elements with maximum loadability, and to follow a triple quality control policy in series production.

In the case of JULIUS-K9® dog harnesses, in addition to practicality and high quality, the key to success was the targeting of human emotions. In an unprecedented way, the product offered an opportunity for the attachment of velcro patches carrying information. Initially the usual service dog labels, like POLICE, ARMY, etc. were used, then labels like COOL MAN, MINE IS BIGGER, MACHO, NAUGHTY AND NICE, COUCH POTATO, etc. also appeared on some dogs, and the avalanche started.

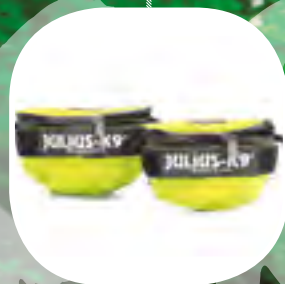

The reputation of JULIUS-K9®, thanks to the (1997) K9®-Powerharness's huge success, reached the farthest corners of the world faster than production could keep pace with. Thus it is no wonder that this fashion craze brought to life a number of copies, necessitating further development in addition to the legal struggles. In 2010 this necessity to act brought to life the JULIUS-K9® product line that became famous under the brand name IDC® (Innova Dog Comfort). Within five years IDC® had become Julius-K9®'s exclusive sub-brand.

# HARNESSES & ACCESSORIES

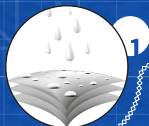

# IDC® POWERHARNESS

## PICTOGRAM GUIDE

size 0-4

### WATER REPELLENT COVER

### FLASHLIGHT HOLDER

The flashlight holder is made of elastic material. Due to this, it can hold various sizes of flashlights. Made of high quality German materials. It can be used simultaneously with the side bags. It's essential for search and rescue dogs and service dogs for working during the night.

### SIDE BAG FIXING OPTION

Side bags are available in 3L and 4L versions for the bigger Powerharness, sizes from 0 to 4. A smaller IDC® Universal side bag has also been available since 2013. With a 250cm3 capacity, it's ideal for carrying documents, vaccination papers, cellphones and dog treats. Julius-K9® invention 2002

### REFLECTIVE EDGES AND CHEST STRAP

One of the most important functions of the IDC®-Powerharness is that it works well also as a visibility vest. The grey line of the chest strap and the edges of the harness are made of reflective materials to help keep your dog visible when out walking in the dark, even from a great distance.

### PERFECT ERGONOMICS

The chest strap is positioned across the sternum of the dog. This way it distributes pressure over the chest area. The benefit of it is that instead of its neck, the dog's chest muscles bear the weight of your pull. Julius-K9® invention 2009

### LUMINOUS, REMOVABLE PATCH

With Julius-K9® logo. Julius-K9® invention 2009

### CLOSABLE HANDLE

### IDC® HANDLE LOCK

The handle fixing / covering option of the IDC®-Powerharness allows 4 combinations. You can fix only the steel ring, only the handle, both of them, or none of them. With these, you can minimize the dog's chances of being blocked. It's really important especially for hunting and search and rescue dogs. NOTE: If the dog is blocked by the bushes the IDC®-Powerharness allows the dog to move backwards easily, so the dog can escape. Julius-K9® invention 2009

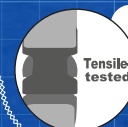

### BREATHABLE, SKIN FRIENDLY INNER LINER

Unfairly, we don't pay enough attention to these great features. The OEKO-TEX® material is manufactured to the highest international standards.

### HEAVY DUTY BUCKLES

The high-quality buckles of the IDC®-Powerharnesses are fully tested and checked. This careful attention is of great significance, especially during wintertime, as the buckles work perfectly and don't break even in frosty weather. Made by Julius-K9®

### AVAILABLE WITH SAFETY LOCK

AVAILABLE WITH SAFETY LOCK IN BLACK COLOR We offer IDC® Powerharnesses with safety locks, these products are designed for enhanced safety. The hook & loop mounting safety lock was developed by Julius-K9® in 2004, chiefly designed for service dogs. This practical accessory increases the load-bearing capacity of the buckle under the chest by 60 kg. It ensures safe use even in case of damaged (chewed) buckles. It has been in use by the City of London Police Dog Unit since 2013

- The new handle closing option allows free airflow under the harness. By using the neoprene covered handle fixing option, the strap lifts the harness about half a cm above the dog's spine. This way, the air can freely flow under the harness, for increased comfort.

- its design reflects the globally successful IDC® design
- during the movements of the dog, the safety lock covers the buckle allows noiseless usage.
- the special anti-slip covering of the harness handle ensures the secure hold of the dog.
- the special coverage of the handle prevents the dog from getting stuck and an unauthorized person can not have access to the handle.
- heightened hook and loop fastener straps for on duty badges.
- the interchangeable Patch label field on the chest strap allows us to attach light reflective elements and parts.

**WARNING!**  
NEVER LEAVE YOUR DOG UNATTENDED WHILE TIED UP.

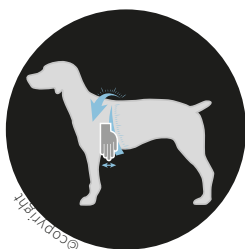

## TAKING YOUR DOG'S MEASUREMENTS AND ADJUSTING IDC® POWERHARNESSES AND K9® HARNESSES CORRECTLY

ATTENTION! AS FROM 1 SEPTEMBER 2016, IT IS MANDATORY TO DISPLAY THE INFORMATION BELOW, INCLUDING PICTOGRAMS, ON ALL ONLINE SALES PLATFORMS, WHERE JULIUS-K9® DOG HARNESSES ARE SOLD. THIS INFORMATION IS COMPLEMENTED WITH A VIDEO. DISPLAYING THE VIDEO IS MANDATORY AS WELL.

ALL THIS MINIMIZES THE RISKS OF DAMAGES RESULTING FROM CHOOSING THE WRONG HARNESS SIZE OR FROM INCORRECT HARNESS ADJUSTMENT.

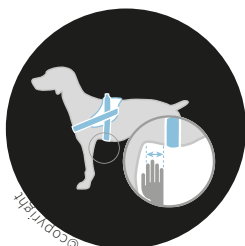

To adjust the hook and loop fastener chest strap developed by Julius-K9® in 1997, open it and loop it through the oval ring which is on the front side of the harness. Close it on the inner side so the hook and loop fastener's hooks and loops are facing each other. Set between the minimum and maximum length settings, the chest strap can support several times the dog's weight.

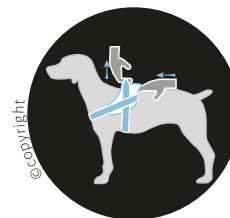

### TAKING YOUR DOG'S MEASUREMENTS CORRECTLY

Taking thorough measurements of your dog is essential for choosing the correct harness size. Place 4 fingers behind the front legs to find where to measure the chest (girth) for harness sizes 0, 1, 2, 3 and 4, and 2 fingers to take measurements for sizes Baby1 and Baby2.

### PUTTING THE HARNESS ON YOUR DOG

Before putting on the harness, it is very important to adjust the chest strap and the lower strap under the chest correctly. If the straps are too loose, the dog might be able to back out of the harness. When the lower strap under the chest is too tight, it is 'merely' uncomfortable for the dog. When the chest strap is too tight, the buckle rubs against the dog's skin in the armpit area,

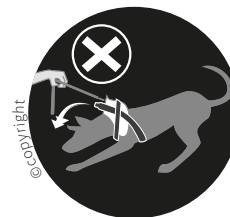

which can cause chafing. If the lower strap under the chest is adjusted correctly, there should be enough room for you to fit your fingers between the dog's back and the harness.

### SECURING THE HANDLE

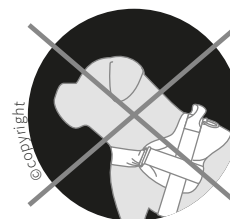

The handle part on the IDC® Powerharness has 4 different fastening options. It is possible to secure only the INOX® ring or only the handle, or both, or neither. Handles on IDC® harnesses (sizes Mini and Mini-Mini) and K9® harnesses can be secured/covered up with hook and loop fastener, thus minimizing the risk of the dog getting caught on something by the handle part. This is especially important for dogs running free.

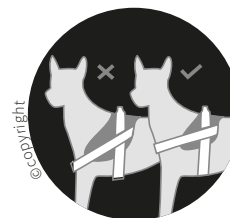

### WHAT TO DO IF THE DOG BACKS OUT OF THE HARNESS?

In case your dog attempts to slip out of the harness by backing out of it, or tries to pull its head out of the collar, avoid pulling the leash.

### CHOOSING THE CORRECT HARNESS SIZE IS ESSENTIAL FOR A SAFE AND COMFORTABLE USE

**Warning!** Choosing the wrong harness size, as well as incorrect harness adjustment and collar use may result in the dog slipping out of the harness or the collar. If the harness is too small, the chest strap puts pressure on the dog's neck instead of distributing it over the chest area. Choosing the wrong harness size may result in injury.

The right harness size should leave the dog with enough room in the shoulder area and it should be able to move its legs freely. If the harness is too big, the dog might step over the chest strap with its front legs. JULIUS-K9® holds no responsibility for any injuries resulting from choosing the wrong harness size or incorrect harness adjustment.

### WASHING INSTRUCTIONS

Do not Machine wash!  
Hand wash. Maximum temperature 40°C or 105°F.  
Wash separately!

STORE IN A DRY PLACE AWAY FROM DIRECT SUNLIGHT.

## IDC® BELT HARNESS

*European  
handmade*

SIZE  
**MINI-MINI-3**

The IDC® belt harness's new Color & Gray® collection was created in 2015. As an addition to its known ergonomically optimized design new qualities were added to the product, in terms of improved comfort. To ensure this, the edges of the straps were rounded and thickened. Color & Gray®'s color scheme and designs are protected by industrial design rights. The collection offers accessories to everyday dog owners and for professionals as well.

### IDC® MULTIFUNCTIONAL DOG VEST 3IN 1

*Multifunctional swimming vest with removable floating foam pads. Great aid for swimming and useful for lifting the dog, as the foam pads also act as pressure distribution pads (rehabilitation vest). If you remove the floating foam pads from the life saving vest pockets, you get a neoprene jacket. This jacket protects your dog from rain, wind and cold. As a swimming vest, it's functional for hydrotherapy. By reducing or increasing the number of floating pads, you can adjust the vest to the level of the exercise. With a strong handle and a ring for the leash, it's easy to control or hold the dog.*

The high-quality buckles of the K9®-Powerharness is fully tested and checked. This careful attention is of great significance, especially during wintertime, as the buckles work perfectly and don't break even in frosty weather.

### REFLECTIVE EDGES AND CHEST STRAP

One of the most important functions of the K9®-Powerharness is that it works well also as a visibility vest. The grey line of the chest strap and the edges of the harness are made of reflective materials to help keep your dog visible when out walking in the dark, even from a great distance.

### SIDE BAG FIXING OPTION

Side bags are available in 3L and 4L versions for the bigger Powerharness, sizes from 0 to 4. A smaller IDC® Universal side bag has also been available since 2013. With a 250cm³ capacity, it's ideal for carrying documents, vaccination papers, cellphones and dog treats.

### FLASHLIGHT HOLDER

The flashlight holder is made of elastic material. Due to this, it can hold various sizes of flashlights. Made of high quality German materials. It can be used simultaneously with the side bags. It's essential for search and rescue dogs and service dogs for working during the night.

### IT IS PROHIBITED TO LEAVE AN ANIMAL ALONE WHILE TIED UP!

SHOULD BE STORED IN A DRY PLACE AND AWAY FROM DIRECT SUNLIGHT.

### WASHING INSTRUCTIONS

Do not Machine wash! Hand wash. Maximum temperature 40°C.  
Wash separately!

published in 2016

## IDC® FRONT CONTROL Y-BELT FOR POWERHARNESSES

THE IDC® FRONT CONTROL Y-BELT IS A NEW VERSION OF THE K9 PRESSURE DISTRIBUTION Y-BELT DEVELOPED BY JULIUS-K9® IN 2003 AND POPULAR TO THIS DAY, OFFERING FURTHER OPPORTUNITIES FOR SPECIAL POWER HARNESSES EQUIPPED WITH CHEST STRAPS OPENABLE BY A HOOK AND LOOP FASTENER WITH RESPECT TO TRAINING AND EVERYDAY LEADING ON A LEASH. BY THE IDC® FRONT CONTROL Y-BELT THE DOG CAN BE CONTROLLED EASILY, WITHOUT FORCE AND CONFLICT IN TRAFFIC, DURING TRAINING OR IN DANGEROUS SITUATIONS.

FOR BOTH WORK AND WALKING, A LEASH CAN BE ATTACHED TO THE RING OF THE Y-BELT AND THE CENTRAL RING OF THE DOG HARNESS SIMULTANEOUSLY. THEREBY THE BODY OF THE DOG BECOMES EASY TO CONTROL AND MANOEUVRE. IN THIS CASE THE USE OF A JULIUS-K9® DOUBLE CARABINER LEASH IS AN IDEAL SOLUTION FOR LEADING ON A LEASH. A FURTHER ADVANTAGE OF THE FRONT CONTROL Y-BELT IS THAT IT CAN BE ATTACHED TO EITHER SIDE OF A CHEST STRAP OPENABLE BY A HOOK AND LOOP FASTENER, DEPENDING ON THE NATURE OF THE PRACTICE OF LEADING ON A LEASH IN QUESTION. WHEN LEADING THE DOG NEXT TO A BICYCLE\*, THE FRONT CONTROL BELT CAN BE ATTACHED SLID TO THE GIVEN SIDE OF THE CHEST STRAP, THEREBY THE DISTANCE OF THE DOG CAN BE MORE CLOSELY CONTROLLED. THIS PATENT-PENDING INNOVATION ALSO PROTECTED BY DESIGNS CAN BE ORDERED IN THREE DIFFERENT SIZES FOR DOG HARNESSES FROM MINI TO SIZE 4. ATTENTION! THE HOOK AND LOOP FASTENER OF THE FRONT CONTROL Y-BELT SHALL BE FASTENED TO THE HOOK AND LOOP FASTENER OF THE CHEST STRAP OF THE DOG HARNESS ALONG ITS WHOLE LENGTH IN ORDER TO AVOID THE SLIPPING OF THE Y-BELT WHEN HANDLING THE LEASH. WHEN THE FRONT CONTROL Y-BELT IS NO LONGER NEEDED, REMOVE IT BY OPENING THE CHEST STRAP IN ORDER TO PREVENT IT FROM GETTING CAUGHT.

\*THE LOCAL TRAFFIC RULES IN FORCE SHALL BE OBSERVED!

## I-BELT FOR POWERHARNESSES

AN ELASTIC AND ADJUSTABLE ACCESSORY FOR DOG HARNESSSES. ATTACH IT TO THE BELLY STRAP, THE CHEST STRAP UNDER THE CHEST, AND THE COLLAR. IT KEEPS THE CHEST STRAP STABLE, AND ON THE RIGHT PLACE. IT'S PRACTICAL FOR ACTIVE DOGS THAT HAVE A TENDENCY TO SLIP OUT FROM THE HARNESS. THE I-BELT CAN BE ATTACHED TO THE HARNESS WITHOUT REMOVING THE CHEST STRAP. IT'S RECOMMENDED IN THE CAR FOR SAFETY, SHY DOGS AND ACTIVE SPORT DOGS.

**for K9®-POWERHARNESSES & IDC®-POWERHARNESSES**

size 0 - size 4  
code: 162BGI-[S, M or L]

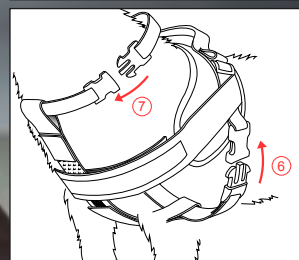

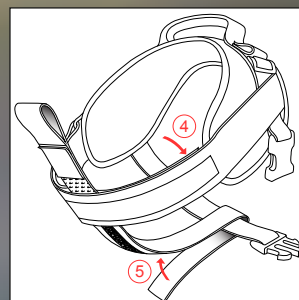

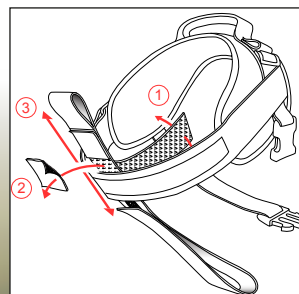

### ATTENTION!

You can use this product only for harnesses with hook and loop fixing on the chest belt, and for collar with quick release made by Julius-K9®. I-belt on choke collar is prohibited!

Developed by Julius Sebő, on the request of the Tököl Prison & Correctional Facility.

with elastic loop

# HARNESS ACCESSORIES

## SEAT BELT ADAPTER

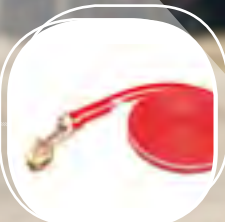

FOR IDC® POWERHARNESS WITH SIDE RINGS. A USEFUL ACCESSORY FOR SAFELY SECURING THE DOG IN THE CAR. THE SEAT BELT ADAPTER IS CONNECTED TO ONE OF THE SIDE RINGS OF THE DOG HARNESS, AND THE OTHER END TO A SEAT BELT BUCKLE OF THE CAR. FOR SAFE USE TWO ADAPTERS SHOULD BE CONNECTED, ONE TO EACH SIDE RING. THE PRODUCT IS AVAILABLE IN TWO SIZES, DEPENDING ON THE WEIGHT OF THE DOG.

This product has limited abilities to save the dog in case of car accidents. It is primarily intended to keep the dog away from the driver and save him from injuries during sudden stops, as well as when the car changes direction.

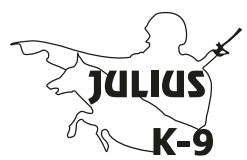

WEIGHT OF THE DOG	CODE
0-25 kg	16SGA-1
> 25 kg	16SGA-2

The seat belt adapter is used for a wide variety of car brands. Please check before use if the adapter is compatible with the latch. In case of improper use Julius-K9® can't assume responsibility for any injuries. This product may not prevent injury in the event of an accident. Do NOT use the product if damaged!

# LEASHES

# IDC<sup>®</sup> LUMINO<sup>™</sup> LEASH

JULIUS-K9<sup>®</sup> invention,  
world's first Lumino leash.

A name 'Lumino' was inspired by the word luminescence which means low-temperature emission of light. One type of this excitation is produced by visible or invisible light spectrum.

1. Light emission immediately after the photon absorption: fluorescence (reflective)
2. Delayed light emission after the photon absorption: phosphorescence.

NEW  
COLOR  
2016

This leash glows (phosphorescent) in the dark. It comes with a strong polyester strap with optimal adherence, covered with silicon-like material, tested and proven on load tests. A phosphorescent material is capable of emitting light only after exposure to light, depending on the duration and intensity of light exposure.

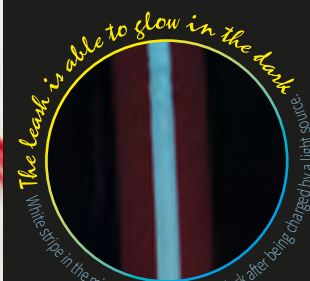

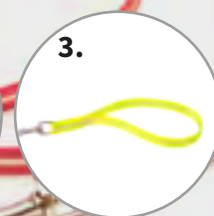

- water repellent
- easy to clean
- disinfectable

It is important to all dog owners to have an easy to use, comfortable and practical leash. The IDC® tubular leash has all these qualities. Due to its easy to clean durable material it is a long lasting product. Great for sport activities, training and for everyday use.

It is a heavy duty leash with special fluorescent lines woven into its material. Due to this unique material, the leash doesn't cut into the hand, not even by pressure and load caused by pulling. Tubular webbing leashes come with a metal carabiner which is easy to open, though it holds safely and reliably.

The IDC® tubular webbing leash is available in different lengths and width with or without a handle.

### ADJUSTABLE ROPE LEASH

12 mm / 0,4 in	2,2 m / 7,2 ft	black with fluor. stripe	20220-S-IDC
----------------	----------------	--------------------------	-------------

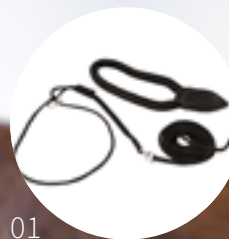

Rope leashes are light, strong and comfortable for both the dog and the owner. They are strengthened with leather on the most challenged parts, for the best stability and safety. They make a good combination with any type of collar and harness. It contains fluorescent threads which give superb visibility even at night.

## CONTACT LEASH WITH STOP

With the contact leash, you can control your dog by small and gentle wrist moves. There is always a quick reaction as an answer for all actions of the dog. The effect lasts only for a second, so it doesn't cause pain, or a longlasting choking feeling to the dog. Recommended for aggressive dogs or dogs with anxiety. The choker function is now limited by a double stop.

## TRACKING LEASH

The tracking leash is made of a light rope with smooth surface, so it's safe and comfortable both for the dog and the handler. Extremely strong and slightly slippery, this helps to avoid inextricable knots.

WIDTH	LENGTH	CODE
6 mm / 0.23 in	10 m / 32.8 ft	2010M

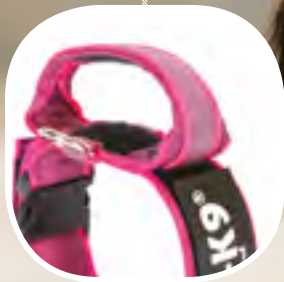

04

## TYING LEASH

The tying leash is useful for bite work trainings and protection work, with a special elastic part for avoiding injuries. Stretches up to 50 cm, so it has no sudden backpull-effect, and helps to the handler to calculate the ideal distances.

LENGTH	WIDTH	CODE
5,5 m	20 mm	110GL

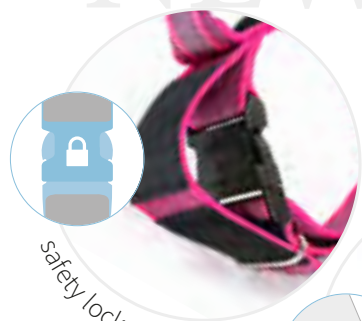

# COLLARS

## DOG COLLARS

safety lock

replaceable patches

closeable handle

With the closable handle at the middle, you can hold your dog safely. It features a heavy duty buckle and a safety lock for perfect stability. Due to its material, it's easy to clean and will not deform. It's easy to put any patch on the patch field of the collar. So from now on, besides on the harness, your dog can also wear cool patches on its collar as well.

Available :

## K9® COLLAR WITH HANDLE

// PINK-GRAY // BLUE-GRAY // RED-GRAY // BLACK-GRAY

# 100% SAFETY

## COLOR & GRAY® COLLAR

In appearance it harmonizes with the Color & Gray® super-grip leash, but without irritation to the fur of the dog, as the thin rubber threads ensuring the optimum grip are replaced by polyester in the collar.

#### NEON (FLUORESCENT) IDC® BALL

The neon colored IDC® fluorescent ball is made of silicon, and it is a perfect motivation toy for puppies and adult dogs as well. Because of its special shape, it perfectly imitates the moves of an escaping prey. You can hide treats inside of the ball, and provide an endless amount of fun to your dog while playing. The closable handle protects the dog from injuries that can be caused by the loop, if the dog were to step in it.

#### IDC® NATURAL RUBBER BALL

The floating ball is made from natural rubber with a well-attached and heavy duty string. The closable handle protects the dog from injuries that can be caused by the loop if the dog steps into it.

# SHOW TRAINING BALL

This toy is ideal for gentle play and for triggering predatory instinct in young dogs. It can be used in water as well as on land. With its striking color and soft design, it is an ideal toy for preparing dogs for shows, or for getting them accustomed to swimming. It is made by traditional handicraft techniques and sewn by hand like the best footballs. This product is available in three sizes.

"Copycats look the same, but real dogs know the difference!"

LEATHER  
JUTE  
COTTON

# TUGS

## LEATHER TUG

All dogs like to play with leather because they are soft, natural, and smell good. The 3/4 in thick cow leather inspires a more confident grip due to its slippery surface. The comfortable and well-fixed handle helps the trainer in his job.

## JUTE TUG

Nylon reinforced traditional Jute fabric for bite work training.

## COTTON/NYLON TUG

Cotton/Nylon tug is one of the most important dog bite training equipment. Its surface is slippery, therefore motivates the dog to bite harder. Heavy duty and bite proof, these qualities are due to its tough nylon enhanced material. This tug's resilience comes from its inner material which is also used by mattress manufacturers. Available in various colors.

# DUMBBELLS

WE DEVELOPED OUR TOYS AND TRAINING EQUIPMENT FOR JOINT ACTIVITIES BETWEEN HUMAN AND DOG.

YOU CAN USE OUR PRODUCTS AT YOUR OWN RISK. IF YOU USE THEM IN WAYS OTHER THAN ORIGINALLY INTENDED WE CAN'T ASSUME RESPONSIBILITY FOR ANY INJURIES.

### WARNING!

Please do not leave your dog alone with these products, as they might chew and/or swallow them. Should be stored in a dry place and away from direct sunlight.

### JOGGING BELT

For jogging, walking, and Nordic skiing. Padded belt with reflective stripes. Attention! Built in protection against sudden pulls, in order to protect your hands and waist.

### LEASH WITH QUICK RELEASE

The rubber leash and the quick release together make a perfect combination. It's a very useful tool for outdoor sport activities and trainings of service dogs. Due to its heavy duty material, it helps to minimize environmental and physiological impacts. With the quick release, the leash can be attached to the jogging belt or to any kind of tactical belts. To disconnect is even easier a strong push or hit to the quick release, and your dog is free.

### JOGGING BELT WITH RUBBER LEASH

For jogging, walking and Nordic skiing. Available in 3 different strengths depending on the weight of the dog.

### QUICK RELEASE

With this small but practical equipment, you can let your dog off the leash very quickly. During outdoor trainings there are situations when it's safer for both the dog and the handler or owner, if they are not connected with a leash. You can release your dog without interrupting your recent activity, or spending long minutes with the carabiner. The quick release is especially practical for service dogs, because with it you can put the dog from 'standby' to 'active mode' in a couple of seconds.

jute	hard 144JH

Teasing tugs

Teasing tugs are tools for beginner dogs with developing grip. The movement of the leather or cotton/nylon teasing tug imitates the unpredictable movements of a life prey, thus it is suitable for triggering and encouraging the predatory instinct. The dog needs to pay attention on grabbing it firmly because the material is slippery by nature. Both the leather and the cotton/nylon version is durable, heavy-duty and resistant. The firmly fixed handle makes the work comfortable for the trainer as well.

Bite pad

- An indispensable tool for developing grip and playful training. The rigid handle in the middle makes it perfect for one-handed use.
1. The cotton/nylon bite pads are available in three sizes and in soft and hard versions. The cover and the highly flexible inner materials are made of JULIUS-K9® fabric, guaranteeing the perfect bite experience. It is an essential equipment for training working dogs.
  2. The leather bite pad gives the perfect bite experience due to its material and slippery surface.
  3. The jute bite pad is made of the thickest and toughest material.

The raw materials, starting from the threads and then the fabrics of the products, are carefully selected by the manufacturing team of Julius-K9®. High cotton content and polyester materials are used in treat tugs, protective arm covers and police dog training equipment.

**WARNING!**  
Please do not leave your dog alone with these products, as they might chew and/or swallow them. You can use our products at your own risk. If you use them in ways other than originally intended we can't assume responsibility for any injuries. Should be stored in a dry place and away from direct sunlight.

Two-handle bite wedge

The two handle bite wedge fits the dog’s mouth perfectly due to its ergonomic shape. Therefore, it is a very useful tool during playful training. Its outer cover is made of first-class cotton/nylon fabric manufactured by JULIUS-K9®. The bite wedge has two wooden handles on both sides and a strap handle in the middle.

The 143BK-W is recommended for puppies the age of over 3-6 month. This equipment is the next level in training young dogs after using the 185HL or 185BW teasing tugs. The purpose of the biting wedge is to help the dog develop a confident grip. Its outer material is gentle on the dog’s teeth and it is the smallest one among our bite wedges. The softness of the foam and the design of the outer fabric helps the puppy to develop a confident grip. Also it is a great training equipment in dog-sports or in hunting. The wooden handles are connected to an inner plastic frame. Due to this design plasticity and stability were greatly increased in the product.

The 144BK-H and 144BK-W is recommended for dogs over the age of 6-8 month. These bite wedges are curved in the middle to encourage the dog to bite in the middle. While using this wedge the dog is forced to open its mouth, wide like using the hard protective sleeves. The flexibility of the soft inner foam material is perfect for triggering the predatory instincts. With these tools the playfulness of the training can be easily maintained.

Bite wedge with 3 handles

The new 3-handle bite wedge offers an ideal transition before doing sleeve work by practicing a sufficiently deep and safe grip. During playful bite training, this equipment will allows the dog to practice jumping into the air and landing on the ground. The design and flexibility of the wedge-shaped grip surface gives the dog a good grip experience and helps them to learn “nasal breathing”. The bite wedge with cotton/nylon fabric is recommended for dogs with uncertain grip. From 2015 Bite wedges with three wooden handles available in soft versions.

Recommended for 8-10 month old puppies. In the next phase of training for 10-12 months old dogs, the short protective sleeves should be used. Our number one models have a replaceable and adjustable cover (bite surface).

WARNING!  
Please do not leave your dog alone with these products, as they might chew and/or swallow them. You can use our products at your own risk. If you use them in ways other than originally intended we can't assume responsibility for any injuries. Should be stored in a dry place and away from direct sunlight.

# Puppy sleeve (with blue strap part)

jute	032WE-2015

1.

2.

# Young dog sleeve (with red strap part)

material	code
1. cotton / nylon	031KW-2015
2. jute	032KW-2015

## Puppy sleeve

After training with a teasing tug and a bite tug, the size of the tool, which imitates the prey, can be increased. In 2015 as an addition to a wide range of bite wedges the JULIUS-K9® puppy sleeve (extra flexible bite wedge equipped with a shoulder protector) was developed. It can be an ideal reward for your 6-8-month old dog. Whilst wearing it, in addition to maximum comfort, it allows the trainer to perform playful tug-of-war and sleeve training. When it is hold with the wooden handle the sleeve is great for “swinging” training.

Due to its inner plastic reinforcement the sleeve is super lightweight and at the same time amazingly stable and bite-resistant. These sleeves are available with covers, made of cotton/nylon or jute fabrics made by JULIUS-K9®. The size of the prey is increased for the dog with the size of the shoulder protector. Made of a soft material.

Neither the weight nor the size of the sleeve causes a problem for the dog to carry the prey as a reward. Its weight distribution is symmetrical,encouraging the dog to grab and to hold it at the middle.

PATENT OFFICE REGISTRATION NUMBER: 002748269-0001

## Young dog sleeve

It is equipped with a medium-hard bite wedge. The jute version is made of the thickest jute fabric, while the cotton/nylon version is made with inner fabric reinforcement. In addition to a wide range of bite wedges the JULIUS-K9® young dog sleeve (extra flexible bite wedge equipped with a shoulder protector) developed in 2015 can be an ideal reward for your 6-8-month-old dog.

Wearing it, in addition to maximum comfort, allows the trainer to perform playful-tug-of-war, sleeve training or when held by the wooden handle, “swinging” training. Due to its inner plastic reinforcement the sleeve is super lightweight and at the same time amazingly stable and bite-proof. These are available with cover made of cotton/nylon fabric made by JULIUS-K9®.

The size of the prey is increased for the dog by the shoulder protector made of a soft material as an extension of the material of the sleeve. Neither the weight nor the size of the sleeve causes a problem for the dog to carry it as a reward. Its weight distribution is symmetrical, encouraging the dog to grab and to hold it at the middle.

K9®-Sport sleeve collection

The members of the sleeve collection are developed in three different hardness. By the summer of 2015 they wrote themselves into the history of the company as the top models of JULIUS-K9®. The developers put a great emphasis on quality materials and developed the equipment with great care to provide many years of use.

The leather cover of the grip surface and the inner foam material are designed for heavy duty use. The comfort and movability of the forearm becomes really evident during work. The hardness of the grip surface is shown by the color of the shoulder protector as well. The **blue** shoulder protector indicates the extra soft version, the **red** the medium-hard version and the **black** the hard version. The red and blue have straight grip surface.

General features:

- extra elbow and handle lining
- straight blade part
- textile lining at the blade part to limit the elongation of the leather

1. soft: 145K9-2015-LW and 145K9-2015-RW

- soft bite surface
- bite surface with inner textile reinforcement
- **blue** shoulder protector and forearm closing element
- extra soft impact area at the blade part

PATENT OFFICE REGISTRATION NUMBER: 002859223-0001

2. medium-hard: 145K9-2015-LMH and 145K9-2015-RMH

- bite surface with inner textile
- **red** shoulder protector and forearm closing element
- leather cover subjected to tensile test
- extra soft impact area at the blade part

PATENT OFFICE REGISTRATION NUMBER: 002859223-0002

3. hard: 145K9-2015-RH and 145K9-2015-LH

- extra flexible bite surface with multiple inner reinforcement
- **black** shoulder protector and forearm closing element
- leather cover subjected to tensile test
- impact area with foam at the blade edge

## K9® Training sleeve

A JULIUS-K9® “training” sleeve that has a curved grip surface. The sleeve with the German flag has the same design as the 144K9-R-W and 144K9-L-W short sleeves - with shoulder protector.

“Germany” 145K9-2015-DE-RW and 145K9-2015-DE-LW training sleeve

- soft bite surface, raised at both sides
  - **black** shoulder protector with the **German national colors**
  - textile lining at the blade part to limit the elongation of the leather
  - leather cover subjected to tensile test
  - maximum movability regardless of the size of the trainers’s arm
  - extra elbow and handle lining
- K-9® European trademark

## FLYING BOMB®— FLIEGERBOMBE®

It gives a “sleeve like” grip experience to both the dog and the trainer. The blade part (bite portion) its high flexibility helps beginner dogs during grip and bite work. The jute outer material is made of the thickest fabric. This tool has become indispensable to improve the jump in the direction of the prey and the grip (bite). It has great movability and comfortable as well. Flying bomb® short sleeve is a fantastic tool to help the trainer divert the dog’s movement during sleeve training. The foam-lined strap at the elbow joint is adjustable to the level of the training and the size of the trainer’s arm. The product is ideal for the preparation for the one grade harder multifunctional sleeve equipped with a replaceable protective cover.

PATENT OFFICE REGISTRATION NUMBER: DE202013010587U1

## Multifunctional sleeve 2015

This truly unique protective sleeve entered the market in the middle of 2015. Its handle ensures a stable hold from both directions. The grip surface is soft, curved and covered with hard-wearing leather. The equipment is an excellent preparation for the hard sleeve. It is adjustable around the elbow joint. The elbow is fully protected by the plastic frame of the sleeve. It allows quick change of sides and maximum movability for the trainer.

The protective cover is attachable with hook and loop straps. With replacing the cover as and when it is required the use of the equipment can be extended up to 10 years.

2in1 sleeve wedge

You can use it as a sleeve (wrap) or as a bite-wedge. It gives the same experience for the dog as a classic protective sleeve. Recommended to use with cotton/nylon or jute cover.

Tactical hidden suit

This super light, hidden protective clothing is an essential wear for protection dog training. It was designed especially for imitating real actions. The arms, chest and legs of the trousers are adjustable with hook and loop straps. With closing the straps, you also close the protective panels inside and this way they give a perfect invisible protection. Arms are easily removable and/or changeable by pulling on a string. To hide your protection gear you should wear a light military coat or any type of cotton clothing without pockets and buckles on top.

Should be stored away from direct sunlight.

The raw materials, starting from the threads and then the fabrics of the products, are carefully selected by the manufacturing team of Julius-K9®.

High cotton content and polyester materials are used in treat tugs, protective arm covers and police dog training equipment.

## Protective jacket & trousers

This protective clothing proved its effectiveness in the WUSV competition. Its material is breathable and scratch-proof due to the special cotton/nylon material. Allows the trainer to move freely and it has a polyester fabric for the perfect comfort. You can use the trousers and the jacket separately or combined with other accessories.

You can use our products at your own risk. If you use them in ways other than originally intended we can not take responsibility for any injuries.
